How Global Fiscal Compliance compares

Verified against current competitor pricing and feature documentation — retailda.com/compare#fiscal-compliance

ALTERNATIVE	WHERE RETAILDA™ WINS
Avalara / Sovos	Regime frameworks — GST e-invoice, VAT, EU fiscal patterns — in the product, not a per-document metered service.
Local fiscal middleware	Immutable chained fiscal journals and authority-ready exports per jurisdiction.
Tally-only compliance	Offline-compliant sequencing — compliant invoices issue air-gapped, register on reconnect.

DEPLOYMENT MODELS

MODEL	WHAT IT MEANS
Shared cloud	Fastest start — provisioned, patched and monitored for you. Per-site pricing, unlimited staff.
Private cloud	Your own isolated instance — one client, one database. No multi-tenant pooling.
TolsTek Host	On-premise enterprise server — ECC memory, power-loss-protected NVMe, hardware RAID. Also runs the local AI daemons.
Air-gapped	Zero external calls, permanently — proven at defence installations where isolation is mandatory.

Deployment & rollout

What a Global Fiscal Compliance deployment actually looks like — bring this page to whoever signs off.

ROLLOUT

01 **Sandbox first**
Your catalogue, opening stock and flows run in a sandbox before anything touches production.

02 **Guided migration**
Bulk import of items, barcodes, suppliers and opening stock — Excel/CSV in one pass.

03 **Pilot site**
One counter or one site goes live first — measured against your old process, not promises.

04 **Staged rollout**
Remaining sites switch over on your schedule — staged, sandbox-first cutover.

COMMERCIAL MODEL

Pricing	Scale plan and above — priced per site, never per user. Staff accounts are unlimited.
Ownership	Your data, your keys, your export — leave with everything. No data lock-in.
Support	Real engineers, ticket-based. Feature unlocks are toggles, not projects.
