GPS Cashier

Geo-verified sessions, drawer counts and keystroke logs.

Every shift opens and closes against the drawer it touches — geo-verified at the register. Blind counts, variance flags, per-register X and Z reports and a keystroke-level event log mean shrinkage stops being a mystery — and commission stops being a spreadsheet.

WHAT IT CHANGES ON THE FLOOR

Geo-verified logins
Tills and field agents only open inside their site perimeter — a register can't ring from a car park, an agent can't sign in from home.

Shift sessions
Open/close registers with blind drawer counts and variance flags.

Commission from the Z
Sales, voids and collections per operator roll out of the Z-report — payroll-ready, no calculator.

Role-gated actions
Refunds, manual discounts, removing sent items, clearing tables — each is a permission, not a shared password.

Keystroke log
Every void, discount and price override recorded against the operator.

PIN & idle control
PIN sign-in, auto-logoff on idle, and registers can't see each other's orders unless you allow it.

In production since 2021 — retail, defence, education, manufacturing & hospitality

Vyapar / myBillBook	Real shift management, keystroke logs and exception queues vs simple billing apps.

DEPLOYMENT MODELS

MODEL	WHAT IT MEANS
Shared cloud	Fastest start — provisioned, patched and monitored for you. Per-site pricing, unlimited staff.
Private cloud	Your own isolated instance — one client, one database. No multi-tenant pooling.
TolsTek Host	On-premise enterprise server — ECC memory, power-loss-protected NVMe, hardware RAID. Also runs the local AI daemons.
Air-gapped	Zero external calls, permanently — proven at defence installations where isolation is mandatory.

Deployment & rollout

ROLLOUT

01 **Sandbox first**
Your catalogue, opening stock and flows run in a sandbox before anything touches production.

02 **Guided migration**
Bulk import of items, barcodes, suppliers and opening stock — Excel/CSV in one pass.

03 **Pilot site**
One counter or one site goes live first — measured against your old process, not promises.

04 **Staged rollout**
Remaining sites switch over on your schedule — staged, sandbox-first cutover.
