PRODUCT DATASHEET · INVENTORY & MANUFACTURING

Manufacturer

Build finished goods; raw or parts stock deducts itself.

Multi-level recipes, production orders and yield tracking. Sell a kit and the components deduct without a manual manufacturing step; run a batch and raw materials post automatically — with actual cost rolled up.

WHAT IT CHANGES ON THE FLOOR

Multi-level BOM
Recipes within recipes — pizzas, computers, formulations — subassemblies cost and deduct correctly.

Kit-selling auto-deduct
Sell the finished item and components decrement on their own — no manual 'make' step for assembled-on-sale goods.

Availability from parts
Parent product stock derives from component positions — you can't sell what the parts can't build.

Production orders
Plan, issue and complete batches with yield variance tracked.

Rolled-up costing
Finished goods carry true component cost plus overhead.

In production since 2021 — retail, defence, education, manufacturing & hospitality

How Manufacturer compares

Verified against current competitor pricing and feature documentation — retailda.com/compare#manufacturer

Odoo MRP	Multi-level BOM, yield variance and serial tracking at a fraction of the per-user MRP stack cost.
Standalone MRP	Recipe-driven depletion living on the same ledger as POS and procurement — no integration boundary.

DEPLOYMENT MODELS

MODEL	WHAT IT MEANS
Shared cloud	Fastest start — provisioned, patched and monitored for you. Per-site pricing, unlimited staff.
Private cloud	Your own isolated instance — one client, one database. No multi-tenant pooling.
TolsTek Host	On-premise enterprise server — ECC memory, power-loss-protected NVMe, hardware RAID. Also runs the local AI daemons.
Air-gapped	Zero external calls, permanently — proven at defence installations where isolation is mandatory.

Deployment & rollout

What a Manufacturer deployment actually looks like — bring this page to whoever signs off.

ROLLOUT

01 **Sandbox first**
Your catalogue, opening stock and flows run in a sandbox before anything touches production.

02 **Guided migration**
Bulk import of items, barcodes, suppliers and opening stock — Excel/CSV in one pass.

03 **Pilot site**
One counter or one site goes live first — measured against your old process, not promises.

04 **Staged rollout**
Remaining sites switch over on your schedule — staged, sandbox-first cutover.
