PRODUCT DATASHEET · MEDIXDA PHARMACY

MedixDA AI

Pharmacy workflows with zero retail bloat.

A dispensing-first front end: prescription-linked sales, schedule-H controls, batch and expiry enforcement and pharmacist sign-off — not a retail register with pills on it. A voice-first MedixDA agent discusses the sale while you dispense, handwritten prescriptions enter as candidate line items, and the same console runs the clinic side — doctor slots, encounters and patient history.

WHAT IT CHANGES ON THE FLOOR

Prescription-linked sales
Rx scans attach to the sale; schedule drugs can't complete without one.

Batch & expiry enforcement
FEFO suggestion at scan time; expired stock cannot be sold.

Schedule H/H1/X control
Drug-schedule rules enforced at the register, not the policy binder.

Pharmacist sign-off
Controlled items hold until a licensed pharmacist approves.

MedixDA Voice + discuss agent
Talk to the agent hands-free at the counter — it discusses the sale, flags interactions and drafts entries while you scan.

The clinic, not just the counter
Doctor day-wise slots, encounters, patient portal and multi-clinic control — dispensing is one wing of the full practice.

In production since 2021 — retail, defence, education, manufacturing & hospitality

AVAILABILITY

Included on Scale, or +₹4,999/site/mo ($69) MedixDA Suite add-on

RUNS ON

Any device · offline-first · your infrastructure or ours

COMPLETE CAPABILITY SET — 21 FEATURES

- ✓ Selectable batches at sale — the operator picks the batch, by dropdown or list
- ✓ Batch documents — attach certificates of analysis and supplier papers to each inventory record
- ✓ Batch, expiry and qty-left on the billing card itself — dispensing-grade information at the till
- ✓ Schedule H/H1/X enforcement at the register
- ✓ FEFO suggestion at scan time
- ✓ Patient profiles with dispensing history
- ✓ GST-compliant billing
- ✓ Statutory controlled-drug register auto-maintained
- ✓ Multi-branch dispensing control
- ✓ Prescription & label scans → candidate line items
- ✓ SMS & WhatsApp refill reminders
- ✓ Supplier purchase-order OCR — POs photograph into draft entries
- ✓ Pharma brand taxonomy — manufacturers and brands as first-class catalogue entities
- ✓ Prescription-linked sales — Rx attaches to the bill
- ✓ Batch & expiry enforcement — expired stock cannot sell
- ✓ Pharmacist sign-off on controlled items
- ✓ Salt-level substitution suggestions
- ✓ Supplier returns for expired stock
- ✓ Margin-aware dispensing prompts
- ✓ MedixDA Voice — hands-free discuss agent at the counter
- ✓ Clinic suite — doctor slots, encounters & patient portal

BUILT FOR

Pharmacy · Chemist

THE ECONOMICS

	RETAILDA™	PER-SEAT SAAS PATTERN
Pricing unit	Per site — staff accounts unlimited	Per user — every hire compounds the bill
Modules	Toggle on what you need, priced like apps	Per-module add-ons stacked on per-seat tiers
Connectivity	Runs fully offline — forever, if you want	No link, no sale
Data	One database per client — export anytime	Multi-tenant pool, export rituals

How MedixDA AI compares

Verified against current competitor pricing and feature documentation — retailda.com/compare#medixda-ai

ALTERNATIVE	WHERE RETAILDA™ WINS
Marg / pharmacy ERPs	Schedule-aware dispensing, expiry lockout and prescription attachment — plus AI that reads the formulary, not just stores it.
SwilERP-class	Multi-branch dispensing control on per-site pricing.

DEPLOYMENT MODELS

MODEL	WHAT IT MEANS
Shared cloud	Fastest start — provisioned, patched and monitored for you. Per-site pricing, unlimited staff.
Private cloud	Your own isolated instance — one client, one database. No multi-tenant pooling.
TolsTek Host	On-premise enterprise server — ECC memory, power-loss-protected NVMe, hardware RAID. Also runs the local AI daemons.
Air-gapped	Zero external calls, permanently — proven at defence installations where isolation is mandatory.

WORKS WITH — the platform fabric

UPI & QR · EMV terminals · ESC/POS & thermal · LoRaWAN · Zigbee · MAVLink · MCP agents · ONDC (testing) · WhatsApp Business · Excel/CSV · CloudPRNT · OTAs via channel pipeline

RUNS WITH

AI Pharmacist Memory · Prescription OCR · Medical RAG Knowledge Base · AI Radiologist

Deployment & rollout

What a MedixDA AI deployment actually looks like — bring this page to whoever signs off.

ROLLOUT

01 **Sandbox first**
Your catalogue, opening stock and flows run in a sandbox before anything touches production.

02 **Guided migration**
Bulk import of items, barcodes, suppliers and opening stock — Excel/CSV in one pass.

03 **Pilot site**
One counter or one site goes live first — measured against your old process, not promises.

04 **Staged rollout**
Remaining sites switch over on your schedule — staged, sandbox-first cutover.

COMMERCIAL MODEL

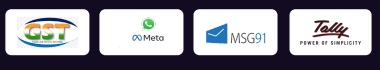

Pricing	Included on Scale, or +₹4,999/site/mo ($69) MedixDA Suite add-on — priced per site, never per user. Staff accounts are unlimited.
Ownership	Your data, your keys, your export — leave with everything. No data lock-in.
Support	Real engineers, ticket-based. Feature unlocks are toggles, not projects.

Included on Scale, or +₹4,999/site/mo ($69) MedixDA Suite add-on
