PRODUCT DATASHEET · MEDIXDA PHARMACY

AI Pharmacist Memory

Patient history and contraindications that persist.

A persistent, consent-scoped patient profile: history, allergies, interactions and refill patterns surfaced to the pharmacist at the moment of dispensing.

WHAT IT CHANGES ON THE FLOOR

Interaction screening
Drug-drug and drug-allergy flags raised before the sale completes.

Patient memory
History, contraindications and refill cadence per patient profile.

Refill prediction
Chronic-therapy patients get refill reminders before they run out.

Consent-scoped
Patient data scoped by consent and role — auditable end to end.

Chronic cadence
Maintenance-medication patients tracked on refill intervals.

In production since 2021 — retail, defence, education, manufacturing & hospitality

RUNS ON

Any device · offline-first · your infrastructure or ours

COMPLETE CAPABILITY SET — 11 FEATURES

- ✓ Persistent, consent-scoped patient profiles
- ✓ Refill cadence & reminders for chronic therapy
- ✓ Interaction data grounded in your formulary
- ✓ Role-scoped access to patient data
- ✓ Chronic-therapy cadence — BP, thyroid and diabetes maintenance plans tracked on intervals
- ✓ Family-linked profiles — one household's dispensing history on one contact
- ✓ Drug-drug & drug-allergy flags before the sale
- ✓ Complete purchase history per patient
- ✓ Auditable dispensing decisions
- ✓ Counselling & clinical notes history
- ✓ Allergy profile blocks — a flagged allergy refuses quietly, not loudly at the counter

BUILT FOR

Pharmacy · Clinics

THE ECONOMICS

	RETAILDA™	PER-SEAT SAAS PATTERN
Pricing unit	Per site — staff accounts unlimited	Per user — every hire compounds the bill
Modules	Toggle on what you need, priced like apps	Per-module add-ons stacked on per-seat tiers
Connectivity	Runs fully offline — forever, if you want	No link, no sale
Data	One database per client — export anytime	Multi-tenant pool, export rituals

How AI Pharmacist Memory compares

Verified against current competitor pricing and feature documentation — retailda.com/compare#pharmacist-memory

ALTERNATIVE	WHERE RETAILDA™ WINS
Marg ERP	Persistent patient profiles with interaction and allergy flags — continuity of care, not just billing.
Standalone pharmacy software	Refill cadence and chronic-therapy reminders fire automatically.
CRM bolt-ons	Patient records live on the dispensing ledger — no sync between 'the CRM' and 'the shop'.

DEPLOYMENT MODELS

MODEL	WHAT IT MEANS
Shared cloud	Fastest start — provisioned, patched and monitored for you. Per-site pricing, unlimited staff.
Private cloud	Your own isolated instance — one client, one database. No multi-tenant pooling.
TolsTek Host	On-premise enterprise server — ECC memory, power-loss-protected NVMe, hardware RAID. Also runs the local AI daemons.
Air-gapped	Zero external calls, permanently — proven at defence installations where isolation is mandatory.

WORKS WITH — the platform fabric

UPI & QR · EMV terminals · ESC/POS & thermal · LoRaWAN · Zigbee · MAVLink · MCP agents · ONDC (testing) · WhatsApp Business · Excel/CSV · CloudPRNT · OTAs via channel pipeline

RUNS WITH

MedixDA AI · Prescription OCR · Medical RAG Knowledge Base · AI Radiologist

Deployment & rollout

What a AI Pharmacist Memory deployment actually looks like — bring this page to whoever signs off.

ROLLOUT

01 **Sandbox first**
Your catalogue, opening stock and flows run in a sandbox before anything touches production.

02 **Guided migration**
Bulk import of items, barcodes, suppliers and opening stock — Excel/CSV in one pass.

03 **Pilot site**
One counter or one site goes live first — measured against your old process, not promises.

04 **Staged rollout**
Remaining sites switch over on your schedule — staged, sandbox-first cutover.

COMMERCIAL MODEL

Pricing	Part of the MedixDA suite — priced per site, never per user. Staff accounts are unlimited.
Ownership	Your data, your keys, your export — leave with everything. No data lock-in.
Support	Real engineers, ticket-based. Feature unlocks are toggles, not projects.
