WHAT IT CHANGES ON THE FLOOR

Velocity-suggested POs
Draft orders built from reorder points, sales velocity and lead time — the reorder question answers itself.

Partial deliveries
Receive half a PO today, the rest next week — each delivery posts against the order; the remainder stays open.

Landing-cost distribution
Freight, duty and handling spread across items — you buy at landed cost, not invoice cost.

Supplier scorecards
On-time rate, fill rate and price history per vendor, per item — margin moves get seen early.

Vendor locking
Duplicate supplier detection and merge before the mess compounds.

In production since 2021 — retail, defence, education, manufacturing & hospitality

How Procurement & Purchase Orders compares

Verified against current competitor pricing and feature documentation — retailda.com/compare#procurement-po

ALTERNATIVE	WHERE RETAILDA™ WINS
Odoo Purchase	Vendor scorecards and price-history margin checks without assembling an Odoo app chain.
Zoho	PO→GRN→invoice matching per site, not per seat.

DEPLOYMENT MODELS

MODEL	WHAT IT MEANS
Shared cloud	Fastest start — provisioned, patched and monitored for you. Per-site pricing, unlimited staff.
Private cloud	Your own isolated instance — one client, one database. No multi-tenant pooling.
TolsTek Host	On-premise enterprise server — ECC memory, power-loss-protected NVMe, hardware RAID. Also runs the local AI daemons.
Air-gapped	Zero external calls, permanently — proven at defence installations where isolation is mandatory.

Deployment & rollout

What a Procurement & Purchase Orders deployment actually looks like — bring this page to whoever signs off.

ROLLOUT

01 **Sandbox first**
Your catalogue, opening stock and flows run in a sandbox before anything touches production.

02 **Guided migration**
Bulk import of items, barcodes, suppliers and opening stock — Excel/CSV in one pass.

03 **Pilot site**
One counter or one site goes live first — measured against your old process, not promises.

04 **Staged rollout**
Remaining sites switch over on your schedule — staged, sandbox-first cutover.
