Stock Audit & Bulk Data

Excel/CSV import-export, counts and variance control.

Cycle counts that don't stop the floor. Scheduled stock takes, blind counts, scan-verified packing, variance investigation and bulk import-export so your catalogue never lives in someone's laptop.

WHAT IT CHANGES ON THE FLOOR

Cycle counts
Rolling audits by zone, category or velocity — no store shutdown.

Pick-and-pack verification
Packers scan against the order — the right item beeps, the wrong item refuses. Errors die at the dock.

Below-min-not-ordered view
One filter: items under reorder point AND not already on a PO — the actual work list.

Variance control
Count vs book discrepancies routed to review with reason codes.

Bulk import/export
Excel and CSV in and out — catalogue, suppliers, opening stock, scheduled.

In production since 2021 — retail, defence, education, manufacturing & hospitality

How Stock Audit & Bulk Data compares

Verified against current competitor pricing and feature documentation — retailda.com/compare#stock-audit

ALTERNATIVE	WHERE RETAILDA™ WINS
Tally-class counts	Cycle counts while the floor keeps selling — variance locks per record, not a stock-freeze-and-shutdown.
Excel imports	Blind counts, scan-verified picking and days-to-BBE per batch — audits, not just uploads.
Zoho Inventory	Physical stock-takes, write-off quarantine and scheduled exports included per site — not an add-on SKU.

DEPLOYMENT MODELS

MODEL	WHAT IT MEANS
Shared cloud	Fastest start — provisioned, patched and monitored for you. Per-site pricing, unlimited staff.
Private cloud	Your own isolated instance — one client, one database. No multi-tenant pooling.
TolsTek Host	On-premise enterprise server — ECC memory, power-loss-protected NVMe, hardware RAID. Also runs the local AI daemons.
Air-gapped	Zero external calls, permanently — proven at defence installations where isolation is mandatory.

Deployment & rollout

What a Stock Audit & Bulk Data deployment actually looks like — bring this page to whoever signs off.

ROLLOUT

01 **Sandbox first**
Your catalogue, opening stock and flows run in a sandbox before anything touches production.

02 **Guided migration**
Bulk import of items, barcodes, suppliers and opening stock — Excel/CSV in one pass.

03 **Pilot site**
One counter or one site goes live first — measured against your old process, not promises.

04 **Staged rollout**
Remaining sites switch over on your schedule — staged, sandbox-first cutover.
