PRODUCT DATASHEET · INVENTORY & MANUFACTURING

Stock Transfers

Secure transfer fleets with digital handover signatures.

Move stock between nodes without shrinkage arguments. A mother warehouse pushes to branches, each transfer is dispatched, tracked in transit and accepted with a digital handover signature — custody is provable at every step, discrepancies resolve at receiving, not at month-end.

97
terminals live on one deployment

5 yrs
production on the original build

Air-gap
proven at defence sites

₹20L
lost in 48h — none since

WHAT IT CHANGES ON THE FLOOR

In-transit custody
Stock leaving a node is never invisible. It sits in transit until someone accepts it — the ₹20-lakh-disappearing-truck problem, solved.

Digital handover signatures
Senders and receivers sign on device; short-shipments are captured at the point of handover.

Vehicle as a node
Delivery vans carry their own stock position for route selling and van replenishment.

Transfer approvals
Route high-value movements through an approver before dispatch.

Searchable everywhere
Transfers, orders and serials search from one bar — no hunting across registers for a shipment.

In production since 2021 — retail, defence, education, manufacturing & hospitality

AVAILABILITY

Available from the Growth plan

RUNS ON

Any device · offline-first · your infrastructure or ours

COMPLETE CAPABILITY SET — 12 FEATURES

- ✓ Location/outlet taxonomy — the catalogue itself knows which store holds what
- ✓ Dispatch → in-transit → accept lifecycle
- ✓ Discrepancy capture at the point of receiving
- ✓ Approval routing for high-value moves
- ✓ Full audit trail per movement
- ✓ Partial receiving supported
- ✓ Conditional formatting and inline edit on stock grids — manage like a spreadsheet, write like a ledger
- ✓ Digital handover signatures at both ends
- ✓ Vehicle-as-node van stock
- ✓ Mother-warehouse → branch push pattern
- ✓ Search orders, transfers & serials from one bar
- ✓ Franchise & inter-entity transfers

BUILT FOR

Retail · Wholesale · Restaurants · Automotive

THE ECONOMICS

	RETAILDA™	PER-SEAT SAAS PATTERN
Pricing unit	Per site — staff accounts unlimited	Per user — every hire compounds the bill
Modules	Toggle on what you need, priced like apps	Per-module add-ons stacked on per-seat tiers
Connectivity	Runs fully offline — forever, if you want	No link, no sale
Data	One database per client — export anytime	Multi-tenant pool, export rituals

How Stock Transfers compares

Verified against current competitor pricing and feature documentation — retailda.com/compare#stock-transfers

ALTERNATIVE	WHERE RETAILDA™ WINS
Tally-class flows	Transfer documents vs a dispatch → in-transit → accept lifecycle with vehicles as stock nodes.
Odoo	Equivalent capability at Odoo Enterprise's per-user price — here it is one line in a per-site plan.

DEPLOYMENT MODELS

MODEL	WHAT IT MEANS
Shared cloud	Fastest start — provisioned, patched and monitored for you. Per-site pricing, unlimited staff.
Private cloud	Your own isolated instance — one client, one database. No multi-tenant pooling.
TolsTek Host	On-premise enterprise server — ECC memory, power-loss-protected NVMe, hardware RAID. Also runs the local AI daemons.
Air-gapped	Zero external calls, permanently — proven at defence installations where isolation is mandatory.

WORKS WITH — the platform fabric

UPI & QR · EMV terminals · ESC/POS & thermal · LoRaWAN · Zigbee · MAVLink · MCP agents · ONDC (testing) · WhatsApp Business · Excel/CSV · CloudPRNT · OTAs via channel pipeline

RUNS WITH

Inventory Control · Procurement & Purchase Orders · COGS & Margin Analytics · Manufacturer · Stock Audit & Bulk Data · IoT Stock

Deployment & rollout

What a Stock Transfers deployment actually looks like — bring this page to whoever signs off.

ROLLOUT

01 **Sandbox first**
Your catalogue, opening stock and flows run in a sandbox before anything touches production.

02 **Guided migration**
Bulk import of items, barcodes, suppliers and opening stock — Excel/CSV in one pass.

03 **Pilot site**
One counter or one site goes live first — measured against your old process, not promises.

04 **Staged rollout**
Remaining sites switch over on your schedule — staged, sandbox-first cutover.

COMMERCIAL MODEL

Pricing	Available from the Growth plan — priced per site, never per user. Staff accounts are unlimited.
Ownership	Your data, your keys, your export — leave with everything. No data lock-in.
Support	Real engineers, ticket-based. Feature unlocks are toggles, not projects.
